TILT AND TURN INTO EXCELLENCE

WINDOWS THAT TRANSFORM HOUSES INTO HOMES

#heart of the home

At PONZIO Studio, we believe that a home is more than just a place—it's a sanctuary where warmth, security, and cherished memories flourish. Our story began with a simple yet powerful vision: to create windows and doors that not only elevate architectural design but also foster the timeless values of family and community. In a world increasingly shaped by individualism and disconnection, we remain dedicated to building homes that inspire trust, connection, and belonging. From these roots, PONZIO Studio has evolved into a boutique company specializing in high-performance, custom-designed windows and doors. With a focus on quality craftsmanship and innovative solutions, we've established a seamless sales and support system, driven by a team of experts who are passionate about excellence in fenestration.

OUR PRODUCTS

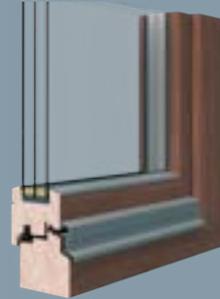

ALUMINIUM WINDOWS

Our aluminum windows and doors combine sleek, minimalist profiles with exceptional performance. Thanks to advanced thermal breaks, they optimize energy savings, enhance comfort, and prevent condensation. Their structural strength allows for larger, more expansive designs, ideal for modern architecture.

CLAD WOOD WINDOWS

Combining natural wood interiors with a durable aluminum exterior, clad wood windows offer warmth inside and strength outside. The wood enhances ambiance, while the aluminum shell ensures low-maintenance, weather-resistant protection. With sleek profiles, they bring a refined, modern touch to any architectural style.

WOOD WINDOWS

Crafted from the finest wood, Ponzio windows embody tradition, elegance, and lasting quality. Their natural insulation enhances warmth and tranquility, creating a serene and energy-efficient home. Designed with timeless craftsmanship, these windows seamlessly complement both historic and contemporary architecture.

uPVC WINDOWS

uPVC windows are the most affordable option for high-performance fenestration. Foam fillings and advanced thermal reinforcements combine strength with superior insulation. Energy efficiency, minimal maintenance, long service life, smooth operation, high stability and narrow frame sightlines.

OUR CLIENTS

We are a trusted provider of premium windows and sliding door solutions for a wide range of applications, including :

residential homes,
retail stores,
large-scale residential projects,
industrial developments.

With a commitment to quality, durability, and energy efficiency, our products are designed to enhance comfort, security, and aesthetics.

We offer a variety of customizable options, including advanced thermal insulation, modern design choices, and a range of materials to meet diverse architectural and functional needs.

Aluminium (ALU) windows

Designed for modern living, our aluminum windows and doors combine sleek aesthetics with top-tier performance. Their slim, stylish frames maximize natural light while maintaining exceptional strength and durability. With advanced thermal break technology, they provide superior insulation, reducing energy costs and preventing condensation for a more comfortable indoor environment.

Built to accommodate expansive glass panels, these windows and doors are ideal for contemporary architecture, creating open and airy spaces. A wide selection of powder-coated and anodized finishes ensures lasting beauty with minimal maintenance, even in extreme weather conditions. Engineered for safety, aluminum frames are fire-resistant and enhance security, delivering both elegance and peace of mind.

ELEVATE YOUR SPACE WITH THE PERFECT BLEND OF FORM AND FUNCTION

Configurations available in Aluminum

Fixed windows

Picture windows are fixed windows that do not operate. They are usually installed in difficult to reach places to illuminate the space.

Tilt & Turn

Tilt & Turn windows are a customer favorite. Fully swing them open to let in fresh air or tilt them inward for safe, secure ventilation—perfect for any lifestyle.

Tilt windows

Tilt windows are a smart, space-saving option for controlled ventilation. They tilt inward at the top, offering security and energy efficiency while maintaining a sleek, modern look.

HS Sliding doors

HS sliding doors bring elegance and ease to your living spaces. Their smooth operation and expansive glass panels create seamless indoor-outdoor transitions, flooding your home with natural light.

ponzio.
WINDOWS

1

The construction of the system and the durability of aluminium give great flexibility in creating large-size structures, even up to 6 m wide.

2

Functional hardware including 4 security points

3

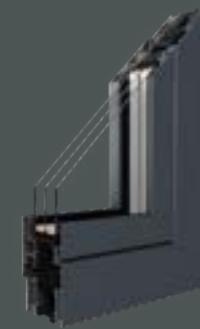

Large, impressive glazings provide even more light

4

In selection of colours we focus on innovation and bold combinations. Apart from the currently most popular grey shades, we offer several hundred other colour versions, available among the RAL colours.

STUDIO

State-of-the-art design

Windows (ALU) are made of profiles distinguished by their unusually slim design, thanks to which they fit in with the design of any modern building.

Mega dimensions

Windows (ALU) are constructions made of much larger elements, thanks to which they offer impressive glazing, providing rooms with even more light.

Ultra strength

Selected profiles and the properties of aluminium enable much bigger constructions than in traditional windows (uPVC).

Clad wood windows

Clad wood windows bring together the warmth of real wood interiors with the durability of an aluminum exterior. Inside, natural wood enhances your home's ambiance with warmth and character.

Outside, the aluminum shell stands strong against the elements, offering low-maintenance performance and long-lasting protection.

With slim, contemporary profiles and a range of finishes, these windows provide a clean, sophisticated look that fits any architectural style. Many options also feature energy-efficient technologies, including Passive House certification, for comfort and sustainability.

TIMELESS BEAUTY MEETS MODERN STRENGTH

Configurations available in Wood Clad

Fixed windows

Picture windows are fixed windows that do not operate. They are usually installed in difficult to reach places to illuminate the space.

Tilt & Turn

Tilt & Turn windows are a customer favorite. Fully swing them open to let in fresh air or tilt them inward for safe, secure ventilation—perfect for any lifestyle.

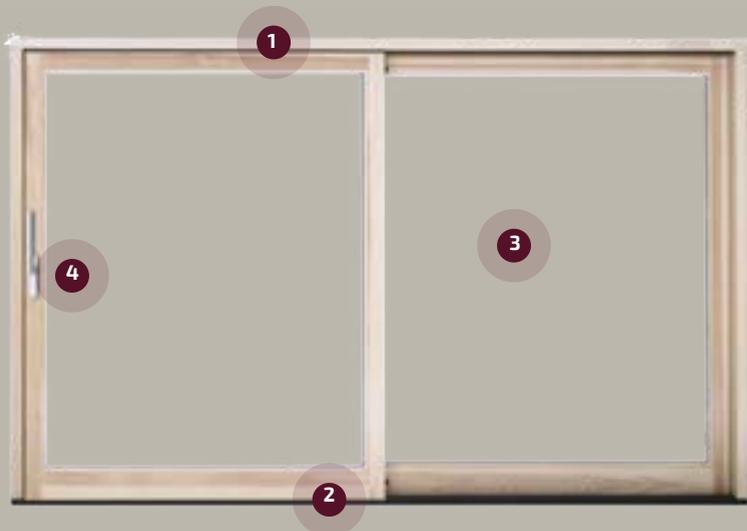

Tilt windows

Tilt windows are a smart, space-saving option for controlled ventilation. They tilt inward at the top, offering security and energy efficiency while maintaining a sleek, modern look.

HS Sliding doors

HS sliding doors bring elegance and ease to your living spaces. Their smooth operation and expansive glass panels create seamless indoor-outdoor transitions, flooding your home with natural light.

STUDIO

- 1** The external aluminum cladding provides excellent insulation and high resistance to weather conditions.
- 2** Wood, a natural building material, brings a sense of security, authenticity, and comfort to any room.
- 3** Double glazing unit with a thickness of 24-32 mm.
- 4** An advanced hardware system that offers users multiple options for opening and tilting the sash.

Sleek, Slim Profiles

With customizable profiles, wood clad windows offer versatile design options that seamlessly fit a wide range of architectural styles while maintaining high-performance standards.

Strong and Durable Construction

The unique combination of wood and aluminum profiles provides exceptional structural integrity, allowing for larger window dimensions without compromising strength or performance.

Energy Efficiency

Offering excellent thermal insulation, wood clad windows reduce energy costs while the aluminum cladding ensures minimal upkeep.

Wood windows

Ponzio's wood windows combine natural elegance with exceptional performance. Crafted from premium-quality wood, they offer excellent thermal and acoustic insulation, creating a warm, quiet, and energy-efficient home.

Designed with precision and attention to detail, these windows are both durable and timeless, perfectly suited for modern and traditional architecture. With customizable finishes and styles, Ponzio wood windows bring a sense of comfort, beauty, and lasting quality to any space.

THE WARMTH OF WOOD, THE PRECISION OF CRAFT

Configurations Available in Wood

Fixed windows

Picture windows are fixed windows that do not operate. They are usually installed in difficult to reach places to illuminate the space.

Tilt & Turn

WINDOWS

1

The warm and elegant appearance of wood adds prestige and coziness to any interior.

2

Energy-efficient triple glazing packages help lower heating costs.

3

Durable Construction - Wood is a strong, sturdy material resistant to deformation and heavy loads. With proper care, wood windows can last for generations.

4

Wide wood selection - Available in oak, pine, larch, meranti, and more

Timeless Aesthetic

The natural warmth and beauty of wood windows create a classic and inviting atmosphere. Whether you prefer a rustic or contemporary style, wood windows offer a versatile design element that enhances any home's architecture.

Customizable Design

Wood windows come in a variety of finishes, sizes, and styles, allowing you to personalize each window to fit your unique aesthetic and functional needs. Whether you prefer a modern, sleek look or a more traditional, rustic feel, wood windows can be tailored to suit your vision.

Eco-Friendly

Made from renewable resources, wood windows offer an environmentally conscious choice. Their sustainable production reduces carbon footprints and helps maintain a healthier planet while still providing outstanding performance.

uPVC windows

uPVC windows offer a cost-effective, long-lasting, and efficient alternative to traditional materials like wood and aluminum. They are made from polyvinyl chloride (uPVC), a durable, weather-resistant, and energy-efficient material.

Ideal for homeowners, architects, and developers looking for modern, stylish, and high-performance window solutions with minimal upkeep.

VALUE IN EVERY FRAME, EFFICIENCY IN EVERY USE

Configurations Available in uPVC

Fixed windows

Picture windows are fixed windows that do not operate. They are usually installed in difficult to reach places to illuminate the space.

ponzio.
WINDOWS

1 Free movement with minimum effort thanks to SLIDE sliding hardware

2 Innovative profiles with sashes that open parallel to the wall and do not „enter“ the room

3 The large glazing surface area of the SLIDE sliding door (PVC) ensures efficient use of solar radiation

4 A wide range of colour options, both classic, imitating various types of wood, and modern veneered on one or both sides

Branded profiles

Ponzio(PVC) windows are characterised by optimum profile widths (up to 86 mm) which, together with the centre gasket (MD), guarantee high energy efficiency (Uw up to 0.72 W/m²K).

Innovative hardware

High levels of user comfort and safety have been achieved through the use of a patented KoPiBo roller, sash lift, 4 safety points and advanced ventilation systems.

Energy efficient glazing

The technology of metal-free glazing packages consisting of three panes with a thickness of up to 52 mm ensures high energy efficiency and durability of the windows for years.

American Heritage windows

Our American Heritage windows combine timeless craftsmanship with cutting-edge technology.

Designed to meet the highest historical and architectural standards, they have been successfully approved by Landmark in NYC, ensuring their authenticity in historically significant projects.

In our state-of-the-art manufacturing facility, equipped with the latest CNC technology, we meticulously craft every detail of frames and muntins to match design specifications or Landmark requirements. This precision allows us to recreate intricate historical profiles while delivering modern performance in energy efficiency and durability.

AMERICAN HERITAGE WINDOWS – HONORING THE PAST, BUILDING THE FUTURE

Configurations Available in Heritage windows:

Double-Hung Windows

One of the most iconic historical window styles. Features two vertically sliding sashes (both operable or with a fixed upper sash in simulated models). Common in Colonial, Victorian, and Federal-style buildings.

Elevated Double-Hung windows

Featuring fixed upper sashes and tilt-open lower sashes. Models approved in landmark districts for energy efficiency while preserving the historic look.

Single-Hung Windows

Similar to double-hung but with a fixed upper sash and a movable lower sash. Provides a historical appearance with improved energy efficiency.

Casement Windows

Hinged on the side and open outward. Frequently found in Tudor, Gothic, and early 20th-century homes.

Arched & Palladian Windows

Feature curved or decorative tops, often divided into multiple panes. Found in Renaissance, Federal, and Neoclassical designs.

WINDOWS

RECENTLY APPROVED BY LANDMARKS DIVISION - BROOKLYN HEIGHTS

Elevated Double Hung windows

We are excited to introduce the Elevated Double Hung Windows to our product line! These innovative windows combine the classic look of traditional double-hung windows with modern functionality. Featuring a fixed upper sash and a tilt & turn lower sash, they provide excellent energy efficiency and ease of use, without compromising on the traditional design.

What's more, the Elevated Double Hung Windows have recently been approved by the Landmarks Division - Brooklyn Heights, ensuring they meet the strict aesthetic and preservation standards required for historic districts.

These windows are the perfect choice for projects that require a blend of classic style, improved energy efficiency, and minimal maintenance, while adhering to the highest preservation standards.

ponzio.
WINDOWS

Energy Efficiency:

Elevated double-hung windows typically feature advanced glazing options, including double or triple glazing, which help to reduce energy loss. The fixed upper sash helps prevent air leaks, contributing to overall energy efficiency and comfort within the home.

Maintenance and Durability:

The tilt & turn lower sash makes cleaning the exterior of the window much easier than traditional double-hung designs, which require opening the window or using ladders. Additionally, wooden exteriors enhance the window's resistance to the elements, reducing maintenance needs.

Functionality:

Elevated double-hung windows combine the benefits of traditional window style with modern improvements. The design minimizes the need for window maintenance and increases convenience, especially with the tilt-in feature for cleaning and the fixed upper sash for better insulation and security.

Ventilation and Airflow:

Like traditional double-hung windows, elevated double-hung windows allow for natural ventilation. The lower sash can be tilted open for airflow, providing a comfortable indoor climate while still maintaining a high level of energy efficiency.
